**Introduction & Key Takeaways**

Jungle Scout’s 2021 Consumer Trends Report is a quarterly study of 1,000 U.S. consumers which explores how spending behaviors and preferences change over time and due to current events. It tracks the types of products consumers are buying, how retail stores and sites are performing, and whether spending is increasing or decreasing online, in-store, and on Amazon in particular.

This report focuses on consumers’ attitudes and behaviors over the first quarter (January through March) and second quarter (April through June) of 2021. It explores how a year of COVID-19-related social distancing and isolation at home, increased dependency on online shopping, and a focus on the “essentials” has shaped consumer behaviors and preferences — perhaps permanently.

1. **Fast and low-cost shipping is now essential for keeping online shoppers happy.**
   - When ordering online, 80% of consumers expect free shipping when ordering a certain dollar amount of items and 66% expect free shipping for all orders.
   - Shoppers want immediate gratification; 91% of consumers expect to receive an online order within a week and 9% expect all online orders to arrive the same day.
   - Consumers say fast or same-day shipping has a major impact on their decision to purchase. Further, 70% stated they would be upset if an order didn’t arrive on time.

2. **Where does Walmart beat Amazon? Prices and Grocery.**
   - Walmart attracts price-conscious consumers and those drawn to the familiarity of the store. Consumers rank price as the top reason they shopped on Walmart.com in Q1. Also, 12% of consumers say they don’t purchase from Amazon because the prices are too high, compared to 8% who say the same for Walmart. Additionally, 39% of Walmart.com shoppers say they have shopped there over the last three months due to familiarity with the store’s products.
   - Walmart still leads in grocery. More than half of Walmart.com shoppers say they have purchased groceries in Q1 compared to only 23% of Amazon.com shoppers.
   - Walmart has a huge customer base, with 54% of consumers shopping in store and 39% online in Q1. However, the retailer still lags compared to Amazon. 71% of consumers say they shopped on Amazon in the same time. And 68% of consumers are Amazon Prime members compared to 41% who subscribe to Walmart+.

3. **Over the past year, more consumers got in on the secondhand market to earn extra income or save.**
   - Nearly a third (32%) of consumers say they are looking for pre-owned products when they shop online. 44% of consumers say they have bought or sold something pre-owned online over the last 12 months.
   - Amazon has served as a popular vehicle for buying and selling pre-owned items online. Among consumers buying or selling pre-owned items online, 66% say they did so on Amazon.
   - 3 in 4 consumers indicate their income is either the same or lower compared to what it was in Q2. Additionally, 60% of consumers say they are currently looking for additional ways to earn money.

Note: Q1 refers to the last survey measurement period (January through March 2021), Q2 refers to the survey measurement period (April through June 2021).

  • About Jungle Scout
Over a year has passed since the onset of the COVID-19 pandemic (beginning its extensive global reach in March 2020). The pandemic touched all aspects of daily life, causing shifts in routines, work and income, housing, health-related behavior, social interactions, shopping and more. A year after such a dramatic disruption began, many U.S. consumers are beginning to rebuild and return to their “normal” activities.

In this chapter, we’ll explore how consumers adjusted their lifestyles, priorities and day-to-day activities. Which changes have had long-lasting effects and which have headroom to stick around? Which activities do consumers feel the most and least comfortable getting back to? What does their current economic condition look like? Additionally, we evaluate consumer behaviors and expectations surrounding shipping, inventory and fulfilment, as well as buying or selling secondhand items online.
**Consumer Lifestyle & Priorities**

**Employment and Income Changes During the Pandemic**

How is the pandemic continuing to impact consumer employment and income? Compared to the previous quarter, consumers’ economic situations are showing signs of improvement. Among consumers surveyed, only 4% are currently unemployed or furloughed due to COVID-19 — down from 8% when measured in Q1. Additionally, only 12% of consumers say their household incomes are lower than they were three months ago — down from 22% in Q1.

**Employment and income:**

- **56%** Employed (full-time or part-time)
- **36%** Student, retired, and other
- **4%** Unemployed (NOT related to COVID-19)
- **4%** Unemployed (lost work due to COVID-19)
- **21%** Income higher in Q2
- **12%** Income lower in Q2
- **64%** Income the same

See Methodology for full demographic data.
Life in Lockdown
As the COVID-19 crisis has continued to evolve, people are living and buying differently. And even during disruptive times, many consumers indicate having made big life changes over the last year like switching jobs, adopting pets, or moving homes.

Lifestyle changes experienced in the last 12 months:

- Adopted or bought a new pet - 18%
- Sold a home - 7%
- Changed jobs - 13%
- Become engaged or married - 6%
- Moved homes - 12%
- Had or adopted a child - 6%
- Bought a home - 11%

Nearly 1 in 5 consumers welcomed home a new pet in the last 12 months.

Consumer priorities remained consistent compared to Q1. Family, physical and mental well-being, and finances remained top focus areas throughout Q2.

What U.S. consumers are prioritizing in Q2 2021:
1. Family - 65%
2. Physical health and well-being - 48%
3. Mental health and well-being - 42%
4. Finances - 39%
5. Friends - 37%
6. Pets - 36%
7. Hobbies and interests - 34%
8. Spirituality - 27%
9. Spending time outside - 27% (up 43%)
10. Love life - 26%
11. Career - 25%
12. Politics/Civic engagement (including environmental, social, cultural causes, etc.) - 18%
13. Education - 17% (up 34%)
14. Travel - 14% (up 42%)

Prioritization of spending time outside, travel and education have increased since the start of 2021. However, consumers continue to place travel as the bottom priority, perhaps due to continued concern for health and safety.
COVID-era Consumers: Which Behaviors & Preferences Will or Won’t Stick

Other responses include spending time online and texting.

⭐ INSIGHTS

- Among consumers participating in activities at home, expectations are that they will decrease the majority of their in-home activities moving forward.
- Consumers expect working from home to taper down. While more than 1 in 4 consumers (27%) say they have increased working from home in the last 12 months, only 19% believe they will continue doing so in the next year.
- 10% of consumers say they are not likely to continue doing more of any in-home activity.

The in-home activities consumers expect will decrease the most are: watching movies/TV, cleaning, and sleeping.

The activities consumers believe will continue the most are: eating healthy, running a business, and DIY activities.
In the past year, consumers have turned to learning **new skills**, focusing on hobbies or things they wouldn’t have had time otherwise to do.

“I became interested in **embroidering and baking**. I somewhat completed them. Embroidering is still a work in progress since I can always improve on my skills. As for baking, I’ll bake a new recipe every week or so.”

“I started playing a **new video game** with my husband to pass the time during lockdown. I still participate because we still don’t feel comfortable going out.”

“I **repainted both bathrooms**, including the vanities. I stripped and repainted all 5 exterior doors and painted the other 18 doors in our house. **I’ve done lots of work in our 1,300 sq. foot garden.** And I’ve started to do socially-distanced volunteer work.”

“I’ve worked on improving my **software development skills** over the past couple of months. I’ve learned new programming languages and programmed a couple of apps to put on my resume in the future. I completed my projects in the past couple of months because I’ve had more time on my hands at home.”
The Online Secondhand Market

Americans aren’t necessarily looking for the lowest-priced items when shopping online, but they are looking for ways to save.

**Insights**

- Nearly a third of consumers (32%) are looking for pre-owned products when they shop online.
- 44% of consumers are using deal-finding browser extensions or plug-ins (e.g., Honey, Pricescout, Amazon Assistant, etc.).
- 60% of consumers say they are looking for additional ways to earn money right now.

**44% of consumers say they have bought or sold something that was pre-owned online over the last 12 months. Among those consumers, 66% say they have bought or sold a pre-owned item on Amazon.**

The abundance of online shopping platforms to buy or sell used goods makes it easy for consumers.

Others places include online auctions, Goodwill, auto dealerships and the Apple store.

Other items include pet supplies, home or holiday decor and auto parts.
Consumer Motivations for Buying or Selling Pre-Owned Products

Consumers have different motivations for secondhand shopping and selling. Some simply want to generate income or dispose of redundant or no-longer-utilized items. Some are looking for specific items or good deals. However, there are others with more emotional reasons:

“I have sold mostly clothing. I sold it to make extra money and also to clear out unwanted items from my home.”

“I bought a cute retro/vintage necklace online because I’m very picky and haven’t seen one like it anywhere else and it was a good deal.”

“I bought the pre-owned items because I appreciate a good deal. I would never reject a good deal just because a product was lightly used by someone else in the past.”

“Sustainability. It’s good for the environment and great for saving money.”

 “[Buying or selling pre-owned items] is fun and we needed the income.”
Delivery & Shipping During the Pandemic

Attitudes and expectations towards delivery and shipping are evolving as consumers have grown to adopt and rely on ecommerce during the COVID-19 pandemic. Online shoppers demonstrate an increased demand for fast and low-cost shipping.

Consumers' online delivery expectations:

- Same day: 41%
- Next day: 18%
- 2-3 days: 24%
- 4-7 days: 9%
- More than 7 days: 5%
- 0%
- NA / never shopped online

Have consumers noticed changes in online shipping speed over the last year? Among consumers surveyed, reactions were mixed, although over a third felt that shipping times have been about the same.

Consumers' observation of shipping speeds over the past year:

- Items arrive faster - 28%
- Shipping time is about the same - 38%
- Items arrive slower - 28%
- N/A - 6%

Shipping speed refers to the time it takes for the product to leave the warehouse to arrive at your destination.

🌟 INSIGHTS

27% of consumers expect to receive something they’ve purchased online the same day or within the next day. However, two- to three-day shipping is seen as the standard for online orders with 41% of those surveyed saying that they expect to receive items purchased online within this timeframe.

Fast shipping is essential. 47% of consumers would be willing to spend more for a product for faster shipping.
Expectations when ordering online:

- **When ordering online, 80% of consumers expect free shipping when ordering a certain dollar amount of items and 66% expect free shipping for all orders.**
- **Delivery timing is important to consumers with 70% stating they would be upset if an order didn’t arrive on time.**

**Most important delivery options — ranked:**

1. Same-day delivery
2. Free return shipping
3. Delivery at a specific time slot
4. Order online and pick up in store
5. Eco-friendly packaging

*Same-day delivery is ranked as more important/more likely to influence consumers to make a purchase compared to delivery at a specific time slot.*
Products that have been difficult to find since the outbreak of COVID-19:

- Hand sanitizer: 48%
- Toilet paper: 44%
- Cleaning wipes and sprays: 40%
- Paper towels: 37%
- Hand soap: 34%
- Groceries: 31%
- Tissues: 28%
- Disposable gloves: 25%
- Medications: 23%
- Thermometers: 16%
- Exercise equipment: 13%
- Bicycles: 12%
- Board games: 12%
- Gardening supplies: 12%
- Office supplies: 12%
- Bakeware: 11%
- Sewing machines: 10%
- Diapers: 10%
- Patio heater or outdoor heat lamps: 9%
- Other: 5%

Based among those that have had trouble finding products online.

Other responses include beauty supplies, books, clothing, arts and craft supplies and small appliances.

53% of consumers have had trouble finding certain products online since the beginning of the pandemic. Essential items like toilet paper, hand sanitizer, cleaning products and groceries have been the most difficult to find.
Chapter 2

Trending Spending: Consumer Pulse Report

Where, how, and what consumers are buying has shifted over time, and could shift quickly throughout 2021. We explore what consumers are buying, how they are adjusting their spending, and the products and stores that are earning their business.
Popular Products: What Consumers Are Buying

Among common consumer product categories, shoppers have continued to prioritize essential products over non-essential items.

### Product categories consumers are buying more or less of in Q1:

**INSIGHTS**

**What are consumers buying more of than before?** 37% of consumers are saying they are buying more groceries and 35% are buying more cleaning supplies, which many would consider “essential” items in the time of the COVID-19 pandemic. Consumers are also buying more health and personal care items.

**What are consumers buying less of, overall?** Nearly a third of consumers (27%) say they are buying less clothing. Additionally, electronics and home and kitchen purchases are down.

**Which product categories rose the most (Q1 2021 compared to Q4 2020)?**
- Garden & Outdoor (up 83%)
- Office Supplies (up 33%)
- Automotive Parts & Accessories (up 25%)
- Exercise/Fitness Supplies (up 24%)

In Q1, individuals spent more according to how their lifestyles have evolved during the pandemic. 22% of consumers are spending more on garden and outdoor products and 20% are spending more on office supplies (likely due to working from home).
Consumers Spending & Projections

The data in this section reflects consumer spending from Q1 2021 as well as projections for Q2 2021.

See consumer spending data for the first quarter of 2021 [here](#).

**Did overall consumer spending change in Q1?**

- 22% say spending decreased
- 10% say spending decreased 51-100%
- 43% say spending stayed the same
- 19% say spending increased 1-50%
- 4% say spending increased 51-100%
- 3% say spending increased over 100%

**INSIGHTS**

In Q1 (January through March) 2021, consumers say their overall spending **stayed the same or decreased**.

- 32% say spending decreased
- 43% say spending stayed the same
- 26% say spending increased

**Will overall consumer spending change in Q2?**

- 17% say decrease 1-50%
- 9% say decrease 51-100%
- 52% say about the same
- 15% say increase 1-50%
- 5% say increase 51-100%
- 3% say increase over 100%

**INSIGHTS**

When asked about their anticipated spending behaviors during Q2 of 2021 (April through June), most consumers said they expect their spending to **stay the same**, but 23% still plan to **increase spending**.

- 26% say spending will decrease
- 52% say spending will stay the same
- 23% say spending will increase
Where People Shop: The Most Popular Stores & Online Retail Sites

Consumers were asked which of the biggest retail stores they shopped at (in store or online) during Q1 2021.

### In-store

**Shopped in-store in the last 3 months:**
- Walmart: 54%
- Target: 30%
- Walgreens: 16%
- Amazon Go or Amazon Grocery: 16%
- Lowe’s: 16%
- HomeDepot: 15%
- Apple: 14%
- Kroger: 13%
- Costco: 12%
- Kohl’s: 10%
- Sam’s Club: 10%
- Best Buy: 9%
- Macy’s: 7%
- Specialty, independent, local, or boutique: 6%
- Albertsons: 4%

### Online

**Shopped online in the last 3 months:**
- Amazon: 71%
- Walmart.com: 39%
- Target.com: 20%
- eBay.com: 19%
- Apple.com: 12%
- Kohls.com: 10%
- Etsy.com: 8%
- BestBuy.com: 8%
- HomeDepot.com: 8%
- Macy’s.com: 7%
- Facebook Shops: 7%
- Lowes.com: 7%
- Costco.com: 6%
- Sam’s Club: 6%
- Wayfair: 5%
- Instagram Shop: 5%
- Walgreens.com: 5%
- Wish: 5%
- Kroger.com: 5%
- Instacart: 4%
- Google Shopping: 4%
- Specialty, independent, local or boutique: 3%
- Albertsons.com: 3%
- Houzz: 2%

### In-store vs. online

Across some of the major retailers, online shopping is coming close to surpassing in-store. Stores like Best Buy, Apple and Macy’s have as many or nearly as many consumers saying they shop online as they do in store.

### Shopped online during Q1:

A bar chart showing the percentage of shoppers who shopped in-store and online for each retailer during Q1. The chart includes prominent retailers such as Walmart, Amazon, Target, and others, with percentages ranging from 0% to 100%.
In-store and online shopping has changed for every retailer in 2021. The following data shows the stores in which consumers have at some point shopped compared to those they’ve shopped at in the past three months, revealing the stores consumers may be dropping in 2021.

**Retail stores & sites consumers are dropping:**

Following trends from Q4, there’s a continued Q1 decline when it comes to in-store shopping at certain large retail stores. For example, shopping in the last three months at Best Buy, Kohl’s, Home Depot, Macy’s, Target, and Lowe’s in store has dropped off. On the other hand, online sites for large retailers (Amazon.com, Walmart.com, Ebay.com and Target.com) have remained strong.

**INSIGHTS**

- In Q2, consumers plan to buy in all types of product categories measured online rather than in store.

- For most types of products, consumers who plan to buy online prefer to buy it on Amazon compared to Walmart.com or another online store. However, some product categories were rated closely: beauty and personal care, cleaning supplies, electronics, exercise/fitness equipment, garden/outdoor products, pet supplies, and vitamins & dietary supplements.

- The types of products consumers plan to shop on Amazon.com for are: arts & crafts, automotive parts & accessories, books/digital books, clothing, home & kitchen items, office supplies, and toys & games.

- The types of products consumers plan to shop on Walmart.com for (more compared to any website, including Amazon) are frequently available at most discount or mass merchandise retail stores: alcohol, groceries, tobacco, pipes & accessories and over-the-counter medicine.
Even with physical stores reopening in many parts of the U.S., online shopping isn’t going away anytime soon. Consumers are continuing to lean into ecommerce for their everyday purchases. And with retailers and companies hurrying to meet demand, consumers have more options to buy online than ever before.

This section explores the reasons consumers favor ecommerce, online shopping habits, as well as how consumers shop on Amazon and Walmart.com.
Online Spending & Shopping Preferences

The data in this section reflects online consumer spending from Q1 2021 as well as projections for Q2 2021. See online consumer spending data for the first half of 2021 here.

Did online consumer spending change in Q1?

- 15% say spending decreased 1-50%
- 9% say spending decreased 51-100%
- 37% say spending stayed the same
- 27% say spending increased 1-50%
- 9% say spending increased 51-100%
- 3% say spending increased over 100%

INSIGHTS

- From Q1 2021, consumers say their online spending has increased.
  - 24% say spending decreased
  - 37% say spending stayed the same
  - 39% say spending increased
- While overall spending trends are mostly consistent with spending trends late in 2020, the amount of consumers who have increased their online spending is higher — a 5% increase since this time period. Additionally, there was a 6% increase in the percentage of consumers who said their spending stayed the same.

Will online consumer spending change in Q2?

- 15% say spending will decrease 1-50%
- 11% say spending will decrease 51-100%
- 51% say spending will stay the same
- 14% say spending will increase 1-50%
- 6% say spending will increase 51-100%
- 3% say spending will increase over 100%

INSIGHTS

- Most consumers said they expect their online spending to stay the same or decrease during Q2 (April through June 2021).
  - 26% say spending will decrease
  - 51% say spending will stay the same
  - 23% say spending will increase

Among consumers that shop online.

**INSIGHTS**

- Highly rated products continue to appeal to consumers more than low-priced products. 70% of consumers are influenced by products with the best ratings or reviews.

- Flexible payment and delivery options are important to the majority of consumers. 58% of consumers agree they prefer shopping with retailers that offer flexible delivery options (buy online and pick-up in store, curbside, etc.). 45% of consumers say they prefer shopping from retailers that offer payment options such as “buy now, pay later,” cryptocurrency, and more.
Top reasons consumers leave product reviews online:

- **Product was excellent**
  - 49%

- **Product was unsatisfactory (for reasons other than arriving broken)**
  - 39%

- **Want to help other buyers understand the product’s size or other relevant characteristics**
  - 34%

- **Product arrived broken**
  - 27%

- **Receive an incentive for leaving a review**
  - 27%

- **Product was more expensive than I felt it was worth**
  - 24%

- **Had ideas about how to improve the product**
  - 20%

Respondents could select multiple answers.

14% of consumers never leave a product review — up slightly from those surveyed in Q1.

More consumers leave reviews when they love a product than when they hate it.

---

Likelihood of returning a product:

<td>4%</td>
</tr>
</tbody>
</table>

**INSIGHTS**

63% of consumers shop online weekly or more often.

### Top devices consumers use to shop online:

- **61%**
  - Personal computer (desktop or laptop)

- **61%**
  - Mobile phone or smartphone

- **34%**
  - Tablet (iPad, Kindle Fire, etc.)

- **13%**
  - Smartspeakers (Amazon Echo, Google Home, etc.)

- **>1%**
  - Other

Respondents could select multiple answers.
Amazon’s Prevalence in 2021 & Prime Membership

Customers continue to value and rely on the world’s largest marketplace for finding the products they need fast.

When consumers shop for a product online, where do they start their search?

- 74% of consumers say they begin their search for a product online on Amazon.
- Although Amazon is on top a substantial number of consumers (44%) begin their search for products online at Walmart.com.
- The number of consumers starting their search via search engine continues to decline while those beginning on social media sites has increased.

64% of consumers say when they need to get a product fast, they look for it on Amazon.

*INSIGHTS*

How Amazon shoppers use and value Amazon:

- **78%** Think Amazon is a good company for consumers
- **77%** Value being able to shop on Amazon
- **54%** Like using Amazon's subscription feature to make repeat purchases

How frequently do consumers shop on Amazon:

- 8% more than once a day
- 9% once a day
- 15% 4-6 times a week
- 11% 2-3 times a week
- 10% once a week
- 18% 2-3 times a month
- 20% once a month or less
- 11% don't shop on Amazon

Among total consumers, 52% are making purchases on Amazon weekly or more.

58% of U.S. consumers say that if they were only able to buy products from a single store, it would be Amazon.
Maximum amount consumers would spend on a product from Amazon:

% strongly/somewhat agree with statement.

**INSIGHTS**

Amazon shoppers have higher expectations for product detail and quality — but they are more price-sensitive compared to general consumers.
In Q1 (January-March) 2021, consumers say their Amazon spending **stayed the same or increased**.

- 26% say spending decreased
- 37% say spending stayed the same
- 37% say spending increased

Most consumers (51%) say they expect their Amazon spending to **stay the same** during Q2 (April-June) 2021.

- 25% say spending will decrease
- 50% say spending will stay the same
- 25% say spending will increase
Amazon Spending by Category: Quarterly Changes

Amazon spending is rising for some categories more than others. See how consumers shopped on Amazon in various product categories in Q1 (January through March) compared to Q4 (October through December):

Other products Amazon shoppers were purchasing in Q1 include: miscellaneous items, music, gift cards or decorations.

⭐ INSIGHTS

- Shopping on Amazon for categories including Groceries, Clothing and Electronics has slowed.
- Shopping on Amazon for Garden & Outdoor, Exercise/Fitness Supplies and Alcohol has picked up in Q1, likely due to consumers spending more time outdoors or getting back to typical activities.
Top reasons consumers DON’T shop on Amazon:

1. Haven’t needed anything from Amazon
2. Trying to spend less money
3. Prefer shopping in stores
4. Don’t have an Amazon Prime account
5. Amazon’s prices are too high
6. Don’t like Amazon
7. Prefer other online shopping options
8. Amazon has been out of stock of any products they were looking for
9. Believe Amazon does not have the type of product(s) they’re looking for
10. Can’t get the brands they’re looking for on Amazon
11. Quality of past Amazon purchases has been poor
12. Deterred by the duration or uncertainty of shipping times

Other reasons include finding the website difficult to navigate, too many options, or never home for delivery.

How COVID-19 has affected shopping on Amazon:

3 out of 5 consumers...

- are shopping more frequently on Amazon since the COVID-19 pandemic than previously (62%).
- have a greater appreciation for Amazon now than they did prior to the COVID-19 pandemic (61%).
- say Amazon has provided products that they could not get anywhere else during the COVID-19 pandemic (62%).

INSIGHTS

Among those not shopping on Amazon:

- 12% of consumers feel that Amazon’s prices are too high.
- 10% of consumers did not purchase products on Amazon due to stock concerns, compared to 5% of consumers in Q4 (October through December).
- Only 16% of consumers said that they have been trying to spend less money, compared to 26% of consumers in Q4.

In Q2, 45% of consumers say they would be fine if they never shopped in a physical store again — up slightly from 43% in Q1.
Amazon Prime Membership

Amazon Prime membership & interest:

- Have: 59%
- Have, but may cancel it: 19%
- Don’t have, but would consider it: 9%
- No interest: 9%
- Don’t know: 4%

Planning to Shop on Prime Day 2021

- Yes: 17%
- Maybe: 42%
- Don’t plan to: 32%
- NA / No Prime Account: 10%

**INSIGHTS**

68% of consumers are currently Amazon Prime members (down slightly from 70% in Q4).

48% of consumers have shopped on Amazon Prime Day in the past (up slightly from 45% in Q4).

48% of consumers often leave items in their Amazon shopping cart and forget about them.
The Growth of Walmart, Walmart.com & Walmart+

Competition in the ecommerce space continues to increase as large retailers like Walmart add online innovations and offerings.

**INSIGHTS**

In Q1 (January-March) 2021, consumers say their Walmart in store spending **stayed the same or decreased**.

- 31% say spending decreased
- 43% say spending stayed the same
- 26% say spending increased

Walmart.com spending has largely **stayed the same** although 27% of consumers say their spending has increased.

- 27% say spending decreased
- 47% say spending stayed the same
- 27% say spending increased

Among those that have shopped on Walmart.com or Amazon.com in Q1.
Top reasons consumers shop on Walmart.com in Q1:

1. Like Walmart’s prices
2. Familiar with Walmart’s products
3. Can get the products I need fast
4. Can find the brands I’m looking for
5. There is a Walmart near me for easy pick-up or returns
6. Have always shopped from Walmart
7. Find the website easy to use and navigate
8. Like the Walmart app
9. Have a Walmart+ account
10. Free next-day delivery without having to have a membership
11. Curbside pickup
12. Prefer getting products from Walmart to Amazon

Other reasons include Walmart’s insurance program and convenient delivery slots/tracking.

Top reasons consumers DON’T shop on Walmart.com:

1. Prefer shopping in stores
2. Haven't needed anything from Walmart
3. Don’t have a Walmart+ account
4. Prefer other online shopping options
5. Trying to spend less money (ranked 2nd for Amazon.com)
6. Walmart has been out of stock of any products they were looking for
7. I don’t like Walmart
8. The quality of products I’ve bought from Walmart has been poor.
9. Walmart does not have the type of product(s) I am looking for.
10. Walmart prices are too high
11. Can’t get the brands I’m looking for on Walmart
12. Found the website difficult to use or navigate
13. Deterred by the duration or uncertainty of shipping times

Other reasons include shipping costs and the concerns surrounding the quality of merchandise.

⭐️ INSIGHTS

- 50% of consumers say price is the top reason they have purchased from Walmart.com in Q1.
- 2 in 5 consumers have purchased on Walmart.com because they are familiar with its products.
- 1 in 5 consumers say they prefer getting products from Walmart compared to Amazon.

⭐️ INSIGHTS

- The main reason consumers cited for not shopping on Walmart.com in Q1 was because they prefer to shop in stores.
- Only 8% of consumers don’t shop on Walmart.com because prices are too high compared to 12% for shopping on Amazon.
- Not having a membership is higher on the list of reasons consumers don’t shop on Walmart.com when compared to Amazon (ranked 4th).
- Among consumers that haven’t shopped on Walmart.com, only 7% say it is because the website was too difficult to navigate (the same when compared to Amazon.com) and only 6% say it’s due to the uncertainty of shipping times (compared to 8% for Amazon).
When shopping on Walmart.com, some benefits are more important than others:

- **65%** Lowest price
- **61%** Best ratings/reviews
- **60%** Ratings/reviews that contain photos or videos
- **55%** Most impressive features
- **55%** Products that are recommended
- **45%** Faster shipping
- **43%** Walmart’s Mobile Scan & Go check out
- **43%** Walmart’s member prices on fuel

% strongly / somewhat agree with statement.

- 15% don’t have an Amazon prime account, but would consider getting one.
- 14% have an Amazon prime account but plan to cancel it.

4% also have an Amazon prime account that they use occasionally.

5% don’t have an Amazon prime account, but would consider getting one.

3% don’t have an Amazon prime account and don’t think they will get one.
Chapter 4

Brand Loyalty

Whether in store, online, or on Amazon, brands are increasingly being challenged to differentiate themselves in order to gain market share and retain customer loyalty. So what do consumers care about when it comes to brands? We dig into brand preferences by product category and more.
## Brand Tips: Top Reasons Consumers Buy

Top reasons consumers buy from a specific brand:

<table>
<thead>
<tr>
<th></th>
<th>Top Reason</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Superior quality or performance over competitors</td>
<td>39%</td>
</tr>
<tr>
<td>2.</td>
<td>Consistently lower prices than competitors</td>
<td>35%</td>
</tr>
<tr>
<td>3.</td>
<td>Good customer service</td>
<td>35%</td>
</tr>
<tr>
<td>4.</td>

Brand loyalists look for *specific brands* of these types of products most:

- **88%** Groceries
- **87%** Cleaning Supplies
- **85%** Beauty & Personal Care
- **84%** Clothing
- **84%** Electronics
- **83%** OTC Medicine

Percentage of consumers who would always or sometimes look for a specific brand of this type of product.
Do consumers look for specific brands online?

- **Always**: 31%
- **Maybe - depends on the product**: 40%
- **Maybe - if they are more affordable**: 14%
- **Never**: 16%

**Brand loyalty persists among Amazon shoppers.**

Despite Amazon being known as “The Everything Store,” on which consumers can find countless options for a particular product, consumers say they still look for a particular brand when shopping on Amazon.

- **69%** of consumers say that when they need to purchase a product from a specific brand, they look to see if they can purchase it on Amazon.

Nearly a third of consumers say they always look for certain brands when shopping online - this is up from 19% when asked in Q1.
Chapter 5

About the Report

Methodology

Between April 16-19, 2021, Jungle Scout conducted an anonymous survey among a panel of 1,066 U.S. consumers about their buying preferences and behaviors. Respondents represent every U.S. state, all genders, and ages 18 to 75+, as well as all employment types and varying income levels.

The survey asked certain questions about behaviors during the ongoing COVID-19 pandemic, which is described as to have started in the U.S. in March 2020 for consistency among related responses.

Certain analysis also compares responses from this survey to the previous Consumer Trends Survey, where data was collected in January and covers a timespan from October 2020 to March 2021.

Q1 refers to the months of January through March 2021. Q2 refers to the months of April through June 2021.

Using the data

We invite you to explore Jungle Scout’s 2021 Consumer Trends Report, and to share, reference, and publish the findings with attribution to “Jungle Scout” and a link to this page.
